MV 65-I-2

State or Country: off Baja California Norte Field No. S10 65-189

County: Map: {H0623 1963 Topogr. Chart I, 1964

Locality: 48 - 46 naut. mi. off Isla San Martin, 4/1/94 bearing 47-52° T.

From: Lat. 30° 08.3' N., Long. 116° 49.9' W.

~~Water:~~ To: 30° 05.0' 116° 52.2'

Vegetation:

Bottom:

Cover: Temp.:

Shore: Current:

Dist. offshore: 48 - 46 naut. mi. Stream width:

Depth of capture: bottom (except Cyema) Depth of water: (overall) 1308 - 1385 fath. PDR

Collected by S10 Marine Vertebrates party, under Carl L. Hubbs, on

~~Tide:~~ R/V Horizon Date: VI: 9-10: 1965

Method of capture: 6-ft. Sigsbee-type beam trawl; no extra wts

Orig. preserv.: 1:10 buffered formalin Time: 2117 (VI:9) - (VI:10) PDT

Net over 2117 hr. 1308 fathoms (by fathometer)

2154 3200 MWO. ship dead in water. Cs 233°T

screw turns increased, c.u. 1 kt speed.

2206 Trawl appears to hon bottom. Depth 1353 fms

2227 adding 100 MWO - No "bottom-feel"

2229 3306 MWO 2250 taut wire, no vibration

2325 wire very taut, no vibration. 1130 m excess wire out.

2330 start up slowly to 2600 MWO.

2245 300 MWO added total: 3600 MWO

0015 bringing up rapidly from 2600 MWO 1385 fms.

0130 ~~0300~~ Net on deck. Very small catch, but almost wholly of bottom organisms.

~~05~~ [Net may have been on bottom only momentarily.

4 02 26A Cyema atrum: 1 ad. found during day in net.

8 ^ 1 (108)

802 Polychaetes + Sipunculids, etc., starfish
