Sta. No. H 47-12

Locality: Baja California: Cedros Island, on east side near cannery and village of Cedros

Lat. ° 'N.; Long. ° 'W. (USC & GS chart , 19)

Water: [salt]

Vegetation:

Bottom: Temp.:

Shore: [rocky] Current:

Distance from shore: [close] Tide:

Depth of capture: Depth of water: 3.0 - 3.5 fathoms

Method of capture: bait net hauled for sardines

Collected by: boat "Florence L." * Date: XII:3-4 1946

Orig. preserv.: alcohol Time: [printed wg XII:17]

* Art Lyons, skipper, and Elmer Pearson, crew member; received through Van Camp Fleet store (Bill Williams, storekeeper), on advice of Jerry McMullen, Tribune-Sun reporter.

Color when seen beautiful silvery purple with sooty bars and blotches. Reported to have been brighter when fresh. Skipper said fish died soon after being brought on deck. None of many fishermen who saw this fish at Van Camp's had ever seen the like.

Photograph taken XII:17 by Tribune-Sun photographer; 2 by A.S. Loebley XII:18.

30. Trachipterus ijimae Jordan & Snyder

1 lot. gr., 210 mm. Loaned to John E. Fitch, Calif. St. Fish. Lab. (ONLY)

JUL 10 1953

Fish Data Sheet—1m-8,'46 (9814s)97

V:16:1957

V:15:1957 Specimen returned by John S. Fitch, identified as

Trachipsterus cristatus Bonelli

with which Fitch and Walters are synonymizing fijiense

Carl L. Hubbs.

III:30:1959

drawing was made by Leslie Hinton (Mrs. Sam D. Hinton) in January, 1947. Fitch notified. S.L.N.
