

State or County: Baja Calif. Field No. H50-37
 County: _____ Map: _____
 Locality: Melponene Cove, S. end Guadalupe I.
 Lat. _____ N., Long. _____ W.
 Water: very shallow, salt
 Vegetation: very little here; much closer to shore
 Bottom: sandy
 Cover: very little Temp.: 14.8-15.2° at surface
 Shore: steep, lava cliffs Current: _____
 Dist. offshore: about 200 yds. Stream width: _____
 Depth of capture: bottom Depth of water: ca. 10 fath.
 Collected by: J. W. Septon, Jr. Date: I: 30:1950
 Tide: _____
 Method of capture: hook + line, set from area
 Orig. preserv.: 10% form. + borax Time: ~~1900-2030~~ 1900-2030

42. Decapterus hypodus: 1 ad., tagged
 217 mm.
Decapterus sp. 1 (308) DMD

H50-37A Line out over night
 I: 30-31:1950

5. Heterodontus diabolus: 1 ad ♂, tagged.
 77.2 mm.

H50-37B II: 1:1950 0700-0830

51A Medialuna californiensis: 1 ad., tagged, 325 mm.
 H50-37C II: 1:1950 0900-1020

60. Caulolatilus princeps anomalus: 1 ad. (440)*
 DMD
 H50-37D II: 1:1950 1100-1230

35 Paralabrax clathratus: 1 ad. Tagged
 (310) DMD

H50-37E II: 1:1950 1300-1430

60 Caulolatilus princeps: 1 ad. (335)*

Caulolatilus princeps
 anomalus: 3 ad. from H50-37
 300-440 mm

H50-37 F. Overnight II: 1-2: 1950

6 ~~Holothurus ectomelas~~ : 1 sm. ad.
6A Myliobatis californica 1 (ca. 800) width tank

35. Paralabrax clathratus : 1 sm. ad. (203) DMD

H50-37 G II: 2: 1950 1400-1600

(300)*

60. Caulolatilus princeps : 1 Rel. gr. DMD

H50-37 H II: 2: 1950 1600-1720

35. Paralabrax clathratus : 1 ad. (295) DMD

* See left marginal note on first page of H50-37
(over): these 3 Caulolatilus princeps referred to
" Caulolatilus princeps anomalus SIOH50-37-60A
3(300-440)." (If necessary, specimens may be
resorted by lengths.)

210-310 mm
