Collected by Al Allanson & party

Tide: Date: X: 12: 1950

Method of capture: Seined (33' beach seine)

Orig. preserv.: 10% Formalin Time: 1300

San Pedro Nolasco Island is a very steep walled island. Only one possible landing place occurs at the extreme south end of the island. This is a steep cobblestone beach.

Observed 1 Iguana approx 2' long, several turtles while skin diving. Colored slides were taken & will be kept available.
