

Dr Hubbs:

Reference MLR vessel  
reports for March 13, 1951.

Horizon will make a  
deep cast on station  
130,60 for tie-in with  
your deep trawl work.

Paul Horner

JAN 29 1958

The specimens of Myxine circifrons Garman  
that was taken on this cruise in midwater  
one very deep water was separated  
out along with the Phalacrocorax - #81-  
87 - which has since been found for  
special study, but cannot now be located!

Carl L. Hubbs.
