

State or Country: California

Field No. Y 51-257

County:

Map: USC & GS 5114, 1945

Locality: Pelican Bay, Santa Cruz I North side of Santa Cruz I.

Lat. 34° 02'

N., Long. 119° 40' 12" W.

Water: clear, salt

Vegetation: near Macrocyrtis beds along shore.

Bottom: sand

Cover: none

Temp.:

Shore: rocky alitt

Current:

Dist. offshore: ab. 100 yds

Stream width:

Depth of capture:

Depth of water: 40 ft.

Collected by Hubbs, Limbaugh, Froehsig & party on "Orc"

Tide:

Date: VII: 2: 1951

Method of capture: dipnet and spear at light

Orig. preserv.: 10% form + borax Time: 2000 - 2/15

1 - pt. jar; 1 - 3 gal. jar.

Series of larval fish in pt. jar

~~Sagax~~

(229)

8A Sardinops caerulea: 1 ad, speared.

(104)

23A Cololabis saira: 1 W. gr., dipnet. (discarded)

40 Atherinops affinis insularum: 5 sp., ad, speary (discarded)

42. Trachurus symmetricus: 4 ad, speared (one used for bait, 3 preserved) 3(252-273)

47. Hyperprosopon argenteum: 1 ad, speared (161)

53. Sebastes paucispinis: 1 yr, dipnet (85)

~~serranoides~~

53 Sebastes flavidus: 5 yr (4 dipnet, 1 speared) 24 gr. speared 7(66-159)

(over)

61. Larval clinids:

vertebrates given to Div. Mar. Invert., VII-21-'53, G.L.O.
