

State or Country: Baja California (State) Field No. H 52-110
County: _____ Map: _____, 1
Locality: About 2.0 miles southwest of Isla San José

Lat. _____ N., Long. _____ W.
Water: _____
Vegetation: _____

Bottom: _____
Cover: _____ Temp.: _____
Shore: _____ Current: _____
Dist. offshore: _____ Stream width: _____
Depth of capture: _____ Depth of water: _____
Collected by E. R. Wilson (1312 Law St., San Diego; H 8-5580)
Tide: _____ Date: VII. 24. 1952
Method of capture: all but 1 fragmentary fish speared; stomachs saved
Orig. preserv.: Chilled; isopropanol Time: JUL 27 1952

Result of telephone call; Wilson
thought he had discovered young abacore
just ahead of him in at egg case in intestine!

Food contents of 2 stomachs including one from
fish that appeared to be perfect young
indicated "abacore".

Crustaceans, mostly decapods amphipods,
but including euphausiids, 1 or 2 gobies, etc.

Squids - at least 4 very young

Fishes - (most picked up and dried on fire)

42A Trachurus symmetricus: 1 yg. (2 and 3 from

43. Perca alicata - (stomach contents - where examined

53. Sebastes sp.: 4 postlarvae, 2 m (12 + 14 mm. &
fair condition, 2 ventral columns,
just beginning Sebastes.

Much yellow squinched in head &
trunk. Largest one has a very
well defined dark bar not far
behind head.
