

State or Country: California Field No. F 53-29
 County: Monterey Map: Monterey Quad, 1932
 Locality: Pacific Grove, off Hadden Food Products Corporation
Cannery, between Mussel Pt. and Pt. Alones
ca. Lat. 36° 37' N, Long. 121° 54' W.
 Water: salt
 Vegetation: (on hopper) Scattered Eragria and other algae;
dense barnacles (Balanus nubilus?), tube worms (Polychaeta),
 Bottom: and Mytilus edulis
 Cover: dense invertebrates Temp: _____
 Shore: _____ Current: _____
 Dist. offshore: ca. 200 yds. Stream width: _____
 Depth of capture: _____ Depth of water: ca. 30 ft.
 Collected by W. T. Follett
 Tide: _____ Date: X. 6: 1953
 Method of capture: Removed from marine growth on dry docked
 Orig. preserv.: form. 1:10 Time: 0930 fish hopper, which
had been sunk

XII: 21: 1953

Specimen was first thought (from Follett's brief description in letter) to be a new genus other than Euprelichthys, but it is now seen to be of that genus. It was examined at California Academy of Sciences XII: 19 and borrowed on XII: 20 for final identification at SIO. Fleishig instructed to put it through graded series of isopropanol alcohol, up to 40%. Follett has sent description, including color. Identification made. Counts taken letter to SIO. Date in detail ask (to be filled in).

61. ~~Euprelichthys spilargenteus~~ Esselein carli (this specimen was
 Paratype Sal I. Thelen
 reclaimed by W. Follett - CAS, see return
 invoice - it should not have been
 accessioned into the SIO Collection.)
