

State or Country: Field No. ET(B)-H-10
 County: Map:
 Locality: Eastern Pacific Ocean at hydro sta.
ET-H-10
 Lat. 14°00' N., Long. 121°06' W.
 Water:
 Vegetation:

Bottom:
 Cover: Temp.: H₂O 26.1°C Air 76.8°F
 Shore: Current:
 Dist. offshore: Stream width:
 Depth of capture: Surface Depth of water: ca 2200 fms.
 Collected by A.W. Ebeling, John Kuwss & party "Horizon"
 Tide: Date: 7 Oct 1955
 Method of capture: Dip-net & nite lite
 Orig. preserv.: 10% Formalin Time: 1947-2030 pst.

Bull came loose in sealed nite-lite so
 used unsealed light with large bulb-hung up
 so as not to come in contact with the water.
 S. Mammals deep-netted beach. Storm Petrel? which
 flew into light. 3 saw dolphin, Myctophids,
 saw flying fish, Portuguese man-o-war fish,
 Remipede, an adult flying fish and several
 squid including one specimen about a foot long.
 The small specimens were preserved in a pint
 jar, while the large squid & flying fish in
 a 1 gal jar. Light drizzle during station.
 A.W. Ebeling 7 Oct 55

25	<u>Myctophum evermanni</u> Gilbert	2	59-64 mm
	<u>M. australernatum</u> Garman	5	32-83 mm
25	<u>Carichthys tenuiculus</u> Garman	1	18 mm

R.L. Wisner: 1956

25 Symbiolophorus reversus 2(59-61)
