Collected in surface (1) and following
note by collector: "What looks like paper
and the little fish appeared to be an
organism when dip-netted." In view of
the juvenile character of the fish
and of vegetative material in sand
with the fish.

Collection also contained a siphonophore (?),
noted by collector: "The red stringy
substance was in a bottle that had been
brought to 5000 meters" (Turned over
to Division of Marine Invertebrates).
