Bottom: _____
Cover: _____ Temp.: _____
Shore: _____ Current: _____
Dist. offshore: _____ Stream width: _____
Depth of capture: 1 foot Depth of water: about 20 ft.
Collected by: Thomas Broedel (1257 Knoxville St, Ocean Beach)
Tide: _____ Date: VII 2 1957
Method of capture: hook + line
Orig. preserv.: not pres. Time: day

JUN 3 1957

Telephone call give information from
from father of collector then
by Thomas Broedel.

64. *Paralichthys californicus* (Agass): 6 or 7 adults

One of the 6 or 7, weighing about 2 lbs.
was colored just like the
two sides, said a few little
white on the blue side of the
head. No abnormalities or form
were seen, though the suborbital
and a small specimen were
examined side by side. The
head had been cut off & buried
so I did not see it. (X-ref)
