Collected by Inter-American Tropical Tuna Commission

Tide: Date: 7/1/58

Method of capture: from stomach of yellowfin tuna

Orig. preserv.: form Time:

51058-22: 1958

This specimen was brought in by
Member S. Alverson of the Inter-American
Tropical Tuna Commission a few days
ago and was definitely identified
by scale and anal-ray counts.
Apparently Mr. Severson took the
specimen back for recording, but
he furnished it to S.C.

32. Chaetodon humeralis Günther:
Type - Thalichthys stage
26 mm S.H. (form)
S.H. Haeck.

IV: 23: 1958

Specimen brought back some time ago.
Data now added and specimen preserved.
S.H.
