

State or Country: California Field No. 51058-80
County: Los Angeles [Map: USGS 5141, 1948]
Locality: Point Del Rey, Santa Monica Bay
[Coast] Lat. 33° 57.5' N, Long. 118° 27.0' W]
Water: [Salt]
Vegetation: [None]

Bottom: [Sand]
Cover: [None] Temp.:
Shore: [Sand] Current: surf
Dist. offshore: in surf Stream width:
Depth of capture: Depth of water: [a few feet]
Collected by: Walter Wadman
Tide: Date: ix:23:1951
Method of capture: hook - surf fishing
Orig. preserv.: frozen; formal Time:
40% isopropanol

Specimen sent to S.D. by Anita Laughlin of
California State Fisheries Laboratory about the
time of her letter of Sept 28, 1951. I have
also subsequent correspondence. First thought to be
a new sp. of *Benthodesmus*; then iden. with species *angae*.

43A *Assurger angae* (Alexander)

Orig. length (Anita Laughlin), 162.5 mm.

SL 70.16 mm.

Identified to both genus & sp. on basis of
paper by George Tucker, V.5:633.

Carl L. Hubbs
