Collected by Conrad Limbaugh, with P. Best & J. Quinn

Tide: _____ Date: IX: 21: 1959

Method of capture: gill net

Orig. preserv. formaldehyde Time: _____

IX: 21: 1959

Specimens speared from dense school
of fish that looked blue then usual
pale greenish. Were about 3-4" apart
distributed in both respects. Lower 1/3
of P, and cross band also blue.

However, fish seem to be L. tenuis
Teeth in narrow band above broad
below, very small and weak.

4 (A) Leurosthes tenuis (Agass) 1 ad. (42 mm)
Counts taken

Carl L. Hubbs
