Vegetation: _____

Bottom: _____
Cover: in mantle of *Pelagia* Temp.: _____
Shore: _____ Current: _____
Dist. offshore: ca. 1 mile Stream width: _____
Depth of capture: surface Depth of water: ?
Collected by C. Carr Tuttle
Tide: _____ Date: VII: 6: 1960
Method of capture: *Pelagia* dipnetted
Orig. preserv.: 10% buff. form. Time: day

VII: 18: 1960

42A *Palometa similima* (Agres): 1 yg, 49 mm
S.L. (form).

Found in pool after jellyfish was
dipnetted; not seen before;
presumably was in mantle.

Two were taken, the other smaller;
put in aquarium; smaller
disappeared, & presumably
consumed by starfish. Taken
from aquarium and preserved
VII: 18
