

SI061-182

State & Country: Mexico: Baja California Norte Field No. 1961-1V:30 D
County: Map: HO 0619, 1942
Locality: San Felipe Bay, San Felipe, At. Las Arenas
Trailer Camp, at So. end of ~~San Felipe~~ lagoon, about
1 km. S of village center Lat. 31° 01.7' N, Long. 114° 51.0' W.
Water: Salt and clear
Vegetation: none

Bottom: Sand, becoming muddy outward
Cover: none Temp.: mod.
Shore: Sand beach (clean) Current: -
Dist. offshore: to 200 ft Stream width: about
Depth of capture: Depth of water: to 6 m.

Collected by Carl L. Hubbs + party Date: IV:30:1961
Tide: incoming 1/4 - 3/8 high
Method of capture: 100' bag nets, 10 ft wings, ab 10 hauls
Orig. preserv.: 10% formalin Time: 2145-2345 PST

Only invertebrates saved, was a series of squid; also 1 lg. shrimp
Concentrated on channels along shore, particularly
in early hauls.

+ 1 sm shrimp and 1 crab.

- 6. Myliobatis californica: 1 ad. discarded
- Urolophus maculatus: 1, saved
- 8. Albula vulpes: 1 sm. ad.
- Anchoa mitchellii: apparently 2 species, about 1/2 saved.
- Anchoa ? (2 sp?) about 1/2 saved.

26A Myrophis tigrinus: 1 (365)

34. Spheroides lovatius (?) ad. all of 1st haul saved,
a few from later hauls.

40. Seuresthes sabina: nearly all saved.

42. Oligoplites, deep bodied species: 1 ripe ♀

44A Orthopristis reddingi: many adults, mostly discarded.
4(155-169)

icistius
46. Bairdiella sp., apparently a single species.
Hl. gr. - ad., largely discarded. 8(112-159)

Cynoscion parvipinnis? : yellow mouth, apparently
one species, hl. gr. - ad., about 20 discarded.

46 con.) Cynoscion macdonaldi : 1 lg. yg. (285)

60 Dactylagnus murdus 6 spec to V. Springer
for staining 14 Apr 1966

~~60. Myoxocheilus opercularis : Saw ad, saved.~~
incl. running ripe ♀.

64A. ~~Otophidium sp?~~ : 1 lg. yg.
Ophidion galeoides (Gilbert) 1(100)

6 Urolophus maculatus 1(151) DW

64A Paralichthys woolmani : 1 lg. ad (195)

64B Paralichthys aestrivius } = 2 lg. yg. + 1 yg.
→ 3 (62-235)

Carl L. & Laura C. Hubbs.
