

62

State or Country: Baja Calif. Norte Field No. S10-223
 County: _____ Map: S10-SDMNA, 1961
 Locality: W side Pta. Arena Bahía de los Angeles near middle
 of W. shore of the Pta. Arena sand spit.
 Lat. 28° 58.0-58.1 N., Long. 113° 34.3 W.
 Water: rather turbid
 Vegetation: almost none
 Bottom: sand, in part somewhat muddy
 Cover: almost none Temp.: _____
 Shore: _____ Current: _____
 Dist. offshore: 100 ft. Stream width: _____
 Depth of capture: to abt 8' somewhat deeper in outermost haul Depth of water: _____
 Collected by Carl H. and Laura C. Hubbs, Wayne J. Baldwin
 and Keith W. Radford Date: 1 V: 23:62
 Tide: incoming outgoing
 Method of capture: 60' bag seine (4 hauls)
 Orig. preserv.: 10% formal + borax Time: 0915-1200, 1 haul about
 1530-1630 PST 1430

And - 1 qt. jar. The head of the bay is floored with muddy sand with innumerable burroughs and extends in limited belt of grass (Spartina?) and broad flooded area of Salicornia.

6A Rhinobatos sp. : 9 (saved 5).
 1 ♀; 1 imm. ♂; 7 ad. ♂'s. 8 from one haul.
 50 (480-678) tank

Dasyatis brevis : 1 ad. disc.

8. Sardinops sagax : many
 post-larval (mostly) and juveniles,
 largely saved.

Albula vulpes : 1 leptocephalus

34. Spheroides annulatus : 14 ad. disc.
 1 adult seen in a few inches of warm
 water on flooded Salicornia.
 (10 from one haul).

40. Atherinops affinis : many
 larvae - juv., largely saved.
 (over)

- 40 (con.) Colpichthys regis a few, very y^g
44. ^{Orthopristis}
Microlepidotus inornatus : 1 ad. disc.
48. Calanus taurinus 3 ad. disc.
(from 1 haul).
58. Halichoeres semicinctus : 1 surprisingly
small ripe ♀.
59. Glyptus gilberti apparently
2 species, series saved. 48(19-36)
- 59 Evermannia n. sp. 1(30)
- 59A Ametula guaymasae → 51(14-49)
several
64. Hypsopsetta guttulata several
→ 48(14-72.5)
