Collected by crewman on "Sea Quest" for Carl L. Hubbs
Tide: Date: II: 16: 1969
Method of capture: hook and line
Orig. preserv.: 10% formalin Time: day

MV 69-IA-1

5. Heterodontus francisci MS 1 ad. (643)

An effort was made to keep this shark alive for Leighton R. Taylor, Jr. but it died on next day and was preserved in formalin. I suspect it was roughly handled by the crewman in removing hook.

- None saved.
- 35. Paralabrax clathratus: several adults.
 - 42. Decapterus hypodus: 1 adult
 - 50. Pimelomelospion pulchrum: 1 small + 1 lg. ad.
 - 60. Caulolatilus princeps: 2 or 3 adults.

Carl L. Hubbs.
