

State of Country: Baja California N., México Field No. SIO 71-118

County: _____ Map: H.O. 1192, 12th ed., 1951

Locality: Isla San Benito del Oeste (West San Benito)

Lat. _____ N., Long. _____ W.

Water: _____

Vegetation: _____

Bottom: _____

Cover: _____

Temp.: _____

Shore: _____

Current: _____

Dist. offshore: at edge

Stream width: _____

Depth of capture: _____

Depth of water: _____

Collected by Ben S. Nolan, Robert R. Warner, & Spencer R. Luke

Tide: _____

Date: V: 26.1971

Method of capture: quinidine

Orig. preserv.: 10% buffered form. Time: _____

MV 71-I-28

On SIO R/V Alexander Agassiz.

Advantage taken of early morning minus tide, but quinidine doesn't match rotenone or other poisons for collecting. A young Scorpaenichthys marmoratus may be the only new record. Carl L. Hubbs

61 Gibbonsia elegans

8 (55-70)

50 Halichoeres divittatus

~~1(49)~~ 1(149)

61 Parachanna integripinnis

2(49)

55 Scorpaenichthys marmoratus
