Fair catch of fishes and invertebrates.

250 m wire out.

Some specimens from which parasitologists aboard have taken any found are individually labeled in two small plastic bags, duly labeled. They are very anxious to have identifications on these fish specimens, and I'd appreciate help in meeting their need and request. Specimens may be added to Carl L. Hubbs Series, but should retain numbered tags.

1 5 gal. can not completely full, including the bagged specimens handled by parasitologists plus 1 small jar with tiny fishes. C.L.H.
